

Mobius TTS[®] for Tank Trucks

The tank truck industry has unique needs when it comes to managing end to end processes and at Cadec we understand those requirements. We provide adaptable solutions that will enhance the *efficiency* of your operations while improving the *security* of your fleet.

Using an industry proven on-board computer, combined with its easy-to-use back-office application, Mobius TTS wirelessly collects the vital driver and vehicle data from your fleet and translates that into valuable information that you can easily retrieve from its robust reporting capability. Information about driver productivity, account performance, vehicle operation, compliance and safety are displayed in a clear, easy-to-understand format.

Reliable Safety and Compliance Data

Having reliable safety and compliance data protects your business, your drivers, your vehicles and your customers' best interest. Cadec's Mobius TTS provides critical safety and compliance features, including automated DOT Logs, auto DOT location lookup, instant driver coaching, vehicle speed and RPM monitoring, and precise global positioning satellite (GPS) locations. More importantly, Mobius TTS provides a complete picture of what happened on the road, down to the second using our patented "ETOG" program.

Integrated Onboard Data with Back-End Office Application

Share vital fleet logistics information among one or many departments with a single mouse click. Mobius TTS' predefined reports empower users to coordinate all business functions within the organization, through its easy to use, on-demand data access.

Detailed Driver and Vehicle Information

Effective Fuel Management initiatives can save your organization hundreds of thousands in fleet operating costs. To optimize your mobile assets to run at peak efficiency, Mobius TTS provides the required visibility into driver behavior and automation techniques to impact performance.

Timely Route Information

Reduce out-of-route miles with Cadec's comprehensive deviation analysis that will measure actual route performance against a planned route. Timely and accurate route information leads to proactive customer service that will give you a competitive advantage and reduce vehicle maintenance.

Instantaneous Event Notification

Receiving time sensitive data allows you to make critical real-time decisions through integration of Mobius TTS with your dispatching systems.

Accurate Location, Delivery and Pickup Tracking

Capture delivery and pickup information when it occurs. This detailed electronic audit can be shared with your customers to help them track their delivery while in transit.

With Mobius TTS in your vehicles and office, Cadec provides better operational control visibility and automation over your transportation operations. Identify information that *YOU* consider important to solve key business issues with Cadec Mobius TTS to optimize fleet efficiency.

Mobius TTS Benefits

- Precise and objective data
